

Result Accuracy kmean : 65.45454545454545
Graphical representation of clusters

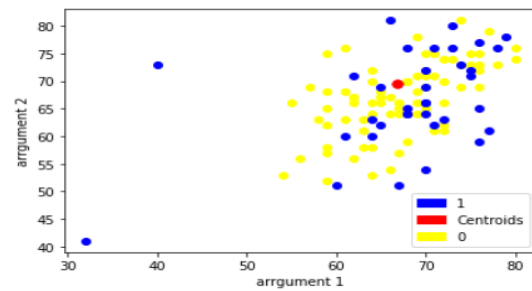

Conclusion Matrix

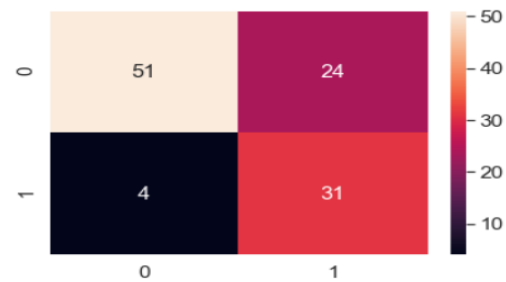

1)kmean clustering

Result Accuracy fuzzy: 74.54545454545455

Graphical representation of clusters

Conclusion Matrix

2)fuzzy clustering

Observation -A we can see the fuzzy method is giving the more accuracy than kmean method also we can the centroids of the clusters. There are 2 combination so conclusion matrix drawn according to max accuracy
